PRESS RELEASE

CYBEROO JOINS THE INTERMONTE VALORE ITALIA INDEX

Reggio Emilia, July 2, 2026 - Cyberoo S.p.A. ("Company"), an innovative SME listed on Euronext Growth Milan and specializing in cybersecurity for businesses and integrated cyber risk management, proudly announces that it has been selected among the one hundred companies listed on Borsa Italiana that make up the Intermonte Valore Italia Index, dedicated to SMEs with a market capitalization below €1 billion and not included in the FTSE MIB.

The Index was created with the aim of enhancing the universe of Italian listed small and medium-sized enterprises, acting as a bridge between entrepreneurship, capital markets, and the national economic system. It represents a true cross-section of Italy's leading economic expertise, helping to broaden and diversify investment opportunities compared to traditional indices, for both domestic and international investors.

Companies are selected based on strict technical and financial criteria designed to ensure adequate levels of liquidity, transparency, and investability, including minimum free float, solid governance standards, analyst coverage, financial sustainability and leverage levels, as well as representativeness within the Index itself.

The Index is part of PMI2Change, the innovative project launched by Banca Generali on July 1, 2026, at Palazzo Mezzanotte of Borsa Italiana, aimed at supporting the growth and competitiveness of Italian entrepreneurs and fostering the development of listed SMEs in Italy. The project addresses the issue of limited liquidity and valuation of listed SMEs, contributing to creating better conditions for a more efficient match between capital and companies.

The initiative builds on the expertise of Intermonte, a leading Italian market operator with over thirty years of experience in financial markets – particularly in SME research, sales & trading, market making, and investment banking – which has been part of the Banca Generali Group since early 2025.

Building on the Index, Banca Generali, together with Investlinx and Intermonte, has launched a new actively managed, PIR-compliant ETF that will primarily invest in the universe defined by the Index itself. Banca Generali has committed to supporting the launch of the instrument with an initial fundraising target of €100 million in the first months, gradually increasing exposure up to €500 million in the medium term. It is estimated that the initiative could generate new investment flows of €1–2 million per day, representing over 5% of the Index's free float.

Veronica Leonardi, CMO & Board Member of Cyberoo, stated: *"We are proud to have been selected by Banca Generali and Intermonte for the PMI2Change project and to be among the 100 Italian listed companies included in the Intermonte Valore Italia Index, which underpins the new ETF. We believe this is an important initiative to refocus attention on Italian companies, which still represent the backbone of our economy's development. For Cyberoo, this inclusion represents further confirmation of the quality, strength, and value of the path we have undertaken, based on innovation, sustainable growth, and long-term value creation."*

Cyberoo S.p.A., a company listed on Borsa Italiana's Euronext Growth Milan, is an innovative SME based in Emilia-Romagna that specializes in cybersecurity for businesses and integrated cyber risk management. The Company develops proprietary solutions and services to protect, monitor, and govern the corporate ecosystem, taking into account cyber risk across its technological, organizational, regulatory, and human dimensions.

Cyberoo's strategic vision is encapsulated in ORBIS, the model through which the Company organizes its offering into an integrated ecosystem that combines technology, processes, compliance, and the human factor, with the aim of reducing fragmentation and strengthening security governance.

Cyberoo's offering is structured into four operational areas: threat management, through the Cyber Security Suite; process governance, via Cyberoo Docetz; regulatory and compliance, with Titaan; and security awareness and training, through Keatrix. The model is specifically aimed at European mid-market companies, which face advanced cyber threats, growing regulatory obligations, and increased organizational complexity, often without the specialized internal structures typical of large enterprises.
